DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Lowcock et al

Lawcock discloses a metallurgical powder blend composition comprising elemental powder of copper and nickel, base iron powder, 0.4% to 0.8% by weight graphite and lubricant, see col. 3, lines 24-47, col. 4, lines 56-61 and claim 13.

While Lawcock does not teach the powder composition is for use in selective laser sintering, however such intended use of the claimed powder composition does not lend patentability to the powder composition.

A mere statement of a new use for an otherwise old or obvious composition cannot render a claim to the composition patentable. See In re Lemin, 51 CCPA 942, 326 F.2d 437, 140 USPQ 273 (1964), In re Thuau 135 F.2d 344, 57 USPQ 324 (CCPA 1943), *Ex parte Douros* 163 USPQ 667 (POBA), and In re Craige, 188 F.2d 505, 89 USPQ 393 (CCPA 1951).

Regarding claim 15, Lawcock teaches the powder blend above is formed into an article by compacting the powder blend into shape, sintering said shape article and cooling said sintered article by isothermal holding or slow cooling following by forming said article. The sintered article taught by Lawcock reads on the three-dimensional

object shaped by sintering of claim 15, absent of any limitation to the dimension of the object.

3. Claims 3-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
